

eMobility Expo 2024 will bring together in Valencia the most innovative proposals to drive the future of mobility

From February 13th to 15th, 2024, eMobility Expo World Congress will gather more than 375 international experts and over 200 exhibiting firms to present the solutions that are transforming the mobility industry

The eMobility World Congress opens Call for Speakers for all mobility industry experts

Madrid, November 7th, 2023 – After a first edition that brought together 5,794 attendees, [eMobility Expo World Congress](#) returns to **Valencia, Spain, from February 13th to 15th 2024**. For three days, the city will once again become the global meeting point to promote the transformation of the transport sector for people and goods, towards a more sustainable mobility. Under the slogan '*We are the future of eMobility*', the event will bring together all stakeholders in the integrated mobility and energy sector to define the mobility of the future: more autonomous, electrified, efficient, sustainable, intelligent, connected, and safe.

The mobility and energy sectors are amid a transformation and a new era of innovation, driven by the European Union's initiatives to achieve a climate-neutral continent in terms of carbon emissions from fossil fuels. More than 15% of Next Generation funds are aimed at achieving a more sustainable mobility industry, to make Europe the locomotive that will drive the ultimate model change by 2035.

"Achieving these sustainability goals requires a collective effort, both from the public and private sectors. That is why eMobility Expo is configured as the largest integrated and multi-specialist business platform for the mobility industry in Europe," said **Jesús Haro, Event Manager of eMobility Expo World Congress**.

The new edition of eMobility Expo will bring together more than 6,000 mobility industry executives looking for technological partners and the latest innovations presented by more than 200 exhibiting companies. The sectors range from automotive, logistics, energy, maritime, air, rail, buses, urban mobility and micro-mobility, to all services and technologies related to smart and connected cities.

The event will once again host the eMobility World Congress, where more than 375 international experts will share the keys to implementing new business models and present the most cutting-edge technological and sustainable trends in the field of mobility. The congress will feature different vertical forums for each industry segment (automotive, rail, energy and batteries, urban mobility and micro-mobility, logistics, maritime, air), as well as specialized agendas for each professional profile: CEOs, CIOs, fleet managers and public administration representatives.

The Congress has now opened the Call for Speakers to participate at the eMobility World Congress. All those experts in the mobility industry who want to lead the debate on the promotion of electric and connected mobility, zero emissions, new transport models, energy

transition or new habits of citizens in their travels, among other topics, [can submit their candidature by December 4th, 2023](#).

In addition, eMobility Expo will feature different activities to foster networking and create synergies among all professionals in the sector, such as the **eMobility Innovation Awards 2024** -the awards that recognize leadership, innovation projects and solutions that will transform the mobility industry-, the **eMobility Startup Forum** -a forum that will host the entire ecosystem of startups that are revolutionizing the mobility sector-, the **Leadership Summit** -a lunch with executives from the main leading companies in the sector-, or the **eMobility Plaza** -a space with exhibitions of the most innovative mobility solutions.

About [eMobility Expo World Congress](#) (February 13th-15th, 2024 – Feria de Valencia): eMobility Expo World Congress is a professional event for the sustainable mobility industry. For three days eMobility Expo will bring together in Valencia the leading firms specializing in micromobility, the automotive industry, technology, manufacturers of electric batteries and charging systems, new fuel sources, products for automated and autonomous driving, components industry, logistics, aeronautics, rail and shipbuilding, as well as startups that are revolutionizing the sector. The eMobility World Congress will be held as part of the event, where more than 375 experts will share the keys to implementing new business models and present the most cutting-edge technological and sustainable trends in the field of mobility.
